hour, worked by production, development, and exploration workers. For per man-

shipped per man-hour.

Represents nonproducing establishments and establishments with no production, development, or exploration worker man-hours, with man-hours spent on exploration or development work amounting to 30 percent or more of total man-hours of production, development, and exploration workers, with cost of contract work amounting to 30 percent or more of production, development, and exploration worker wages, or with number of working proprietors amounting to 30 percent or more of number of production, development, and exploration workers. Also, includes figures for the number and payroll of employees at separately reported central offices and related facilities, if any.

TABLE 9. General Statistics for Establishments Classified by Ratio of Payroll to Value Added in Mining: 1963

[illegible]

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

In computing these ratios contract employment serving the establishment is excluded. The cost of contract work expressed as a percent of payroll for 1963 was: for bauxite, 36 percent; for manganese ores, 9 percent; for tungsten ores and ferroalloy ores, n.e.c., 19 percent.

Represents establishments with zero or negative value added, establishments with no employees and for number of employees and payroll, includes figures for separately reported central offices and related facilities.

Not shown since the cost of supplies, minerals received for treatment, fuels, purchased electric energy, contract work, and purchased machinery installed exceeded value of shipments and receipts and capital expenditures.
